The next generation of the  
**MARKET LEADING**  
one-part water-based gym coating!

For over 15 years, the innovative technology that has been driving Fanatik's success has been unmatched. Because we design and invent polymers from scratch in our own facilities, we are the only company in the world with the ability to provide you with this one-of-a-kind self cross-linking technology. Its flexible design allows it to be repaired while maintaining the same durability expected of a traditional OMU.

And now, through continued research and ambitious ground-breaking advancements, we have engineered the next generation of wood floor care excellence.

# FANATIK

... the **MARKET LEADING** water-based single-component gym finish for the last 15 years.

- Fanatik delivers:
- Easy, dustless prep - no sanding or screening required
- Single-component, just pour and apply
- Adheres to ANY sound gym floor coating
- Fast dry time
- Low odor
- The FANATIK PROMISE

**2 People**

**5 Hours for 2 coats**

**Play on it the next day!**

The shine, the durability, the money and time saved... Fanatik offers everything you've come to expect from Fanatik and more!

Now it's made with polycarbonate, the same material found in the bullet proof canopy of the U.S. Military's new F-22 Raptor fighter jets.

That means **BIG GAINS** in:

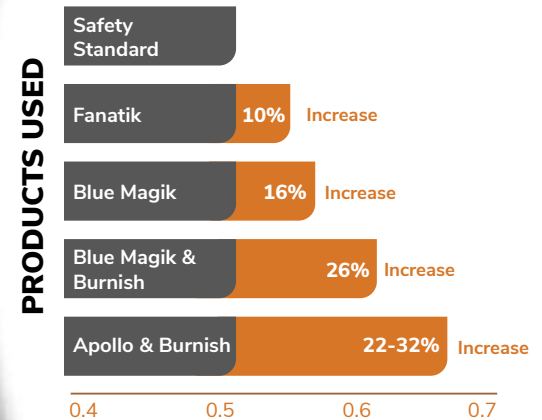

- SCRATCH RESISTANCE**
- SCUFF RESISTANCE**
- DURABILITY**
- DEPTH OF GLOSS**
- GLOSS LONGEVITY**

**Safety Profile**

## Slip-Resistance

Fanatik and our cleaners and restorers all meet ASTM D2047 method for slip resistance.

Proper maintenance keeps floors slip-resistant. This chart illustrates how slip resistance increases with proper use of floor finishes, floor cleaners and floor restorers.

### Anti-Slip Value\*

\*ASTM D2047 requires a slip value of 0.5 or greater for approval.

## Slip and Fall Support

CCI's floor care experts have experience helping customers with unique floor challenges. Feel free to contact us for more information.
