

STEP 1:

Insert the appropriate nut driver into a $3\!\!/8''$ or $1\!\!/2''$ portable drill.

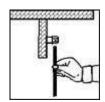

STEP 2

Insert the **SAMMYS** into the #14SW (red) nut driver. With drill unit in a horizontal position and at a right angle to the structural member, begin installation.

STEP 3:

When the nut driver spins free on the SAMMYS, stop the drill and remove.

STEP 4:

The unit is now ready to receive $1\!\!4\text{\,{\sc "}},~3\!\!/8\text{{\sc "}}$ or metric all thread rod or bolt stock.

Note: When installing SWDR, follow the above instructions, add retainer nut and torque until fully seated against purlin (\sim 20 in-lbs.)..

Important Note: Warranty requires the use of the appropriate Sammy Nut Driver for installations.
