

- Meets EPA Safer Choice Direct Release Criteria
- Conforms to OEM specifications for cleaning microchannel coils
- Approved by Carrier for their all aluminum tube/fin constructed condensers. Also approved by other OEMs.
- Ideal for any condenser design
- Low foaming, emulsifying coil cleaner
- Perfect for residential and light commercial applications

## Description

Nu-Calgon's Cal-Green is specially formulated for cleaning all aluminum constructed condensers; including the latest microchannel designs in the HVAC/R market. Also, Cal-Green is ideal for cleaning traditional copper tube/aluminum fin designed heat exchangers.

Besides being formulated to meet OEM guidelines for all aluminum constructed coils, Cal-Green is part of Nu-Calgon's Green Select program since it utilizes ingredients that are safer choices as approved by the EPA under their Safer Choice Direct Release Program. The coil cleaner has been extensively tested to provide performance while using ingredients that have an excellent eco-profile. Cal-Green performs well and is safer for people and the environment.

## Packaging

1 Gallon Bottle	<b>4190-08</b>
55 Gallon Drum	<b>4190-01</b>

## Application

For cleaning for aluminum tube/fin or newer microchannel type air cooled condensers with a product that meets typical OEM guidelines. Cal-Green is an outstanding choice for traditional copper tube/aluminum fin condensers when

## Coil Cleaners

### Cal-Green™

a natural, environmentally friendly coil cleaner is desired. Cal-Green is a low-foaming, metal safe cleaner developed to provide necessary detergency in the removal of dirt and grime from the outdoor coil to restore the system to peak efficiency.

For evaporators, request Evap-Green #4191-08.

## Directions for Use

1. Although Cal-Green has low toxicity and made with eco-friendly ingredients, follow industry guidelines by wearing goggles, gloves, and other protective garments when using this product.
2. System must be shut-off.
3. Apply using any of the Nu-Calgon sprayers or other durable, low pressure plastic sprayers.
4. Prepare cleaning solution by mixing one part Cal-Green to three parts water. Add the water to the sprayer first, and then add Cal-Green.
5. Spray cleaning solution onto the dirty coil, and allow it to remain in contact for 5-10 minutes.
6. Rinse the unit thoroughly with water.
7. Return system to service.
8. Rinse out sprayer, spraying wand, and nozzle.
9. When container is empty, rinse, replace cap, and dispose of properly.
10. For applications where added corrosion protection is desired for the coil or to increase ease of soil removal on the next cleaning, consider Nu-Calgon's Cal-Shield or DuraCoil.

Read and understand the product's label and Safety Data Sheet ("SDS") for precautionary and first aid information. The SDS is available on the Nu-Calgon website at [www.nucalgon.com](http://www.nucalgon.com).
